EXPERIENCE

MedThink, Cary, NC
 - *Developer* **Jan 2018 – Present**

Primary Responsibilities:
 - Collaborating with Creative, Digital Strategists, Clients to develop and execute responsive, for pharmaceutical clients, onboarding new hires.
- Worked with HTML, CSS, JavaScript, RESTful APIs, to create custom responsive emails, websites and web applications for large user bases.

 - Test for code efficiency, cross-browser capabilities, and accessibility using tools such as Broswerstack, Chrome Dev Tools, and Litmus.

 - Gained advanced experience with Flexbox and CSS grids, accessing APIs, hot reload tools like browserify and adapting emails and sites for cross-browser compatibility.

Key Projects:
 - **Cortisol Matters:** A web application for health professionals and patients of Hypercortisolism built with:
 Foundation, Pug, Node.js, and JavaScript on Azure
 cortisolmatters.com

 - **Belbuca:** Migrated from Wordpress to Pug, Sass, and Foundation. Updated website to include video show/hide video transcripts and used an API to create unique savings cards. Built with:
 - Foundation, Pug, Sass, Node, Restful APIs, and JavaScript, on Azure
 belbuca.com

 - **Horizant:** Created a website that uses JavaScript to dynamically show the client different branding depending on whether they are a healthcare professional or patient. Built with:
 Foundation, Pug, Sass, Node, Grunt, and JavaScript, on Azure
 horizant.com

Duke Investigational Drug Services, Durham, NC
 - *Technician II* **October 2015 – Jan 2018**

Primary Responsibilities:
  - Prepared Investigational IV and oral medication, research, and clerical upkeep of study documentation.

Key Projects:
 - **Implementation:** A Sharepoint database to auto-track drug expiration, monitor visits, and other needs. Led instructional presentations on study-specific standards.
